

## Maintenance Indicators

### 1. Features

Filter elements are economically used only if their dirt holding capacity is fully exploited. This is achieved by using filter housings with a maintenance indicator.

Filtration Group manufactures maintenance indicators of the following designs:

- Differential pressure indicators
- Pressure indicators/switches/gauges
- Vacuum switches/gauges

With any filter element the collection of dirt particles continuously reduces the number of open pores or, in other words: The open cross section for allowing the liquid to flow is continuously reduced. Thus the pressure on the upstream side of the element (dirt side) increases continuously.

With pressure filters, the pressure is measured upstream and downstream of the filter element (differential pressure). With return line filters the pressure is measured only on the upstream side because, depending on the tank design, atmospheric pressure exits on the downstream side of the filter element is measured analog. With suction filters the vacuum is measured downstream.

A piston with attached magnet is moved against the force of a spring, with which the indicating point is determined by the piston surface. A homopolar poled magnet is fitted in the outer part in the indicating button.

The closer the pole-springs move towards each other, the stronger is the force with the magnets mutually repel, until finally the red button on the indicator pops out.

This red button remains visible until it is pushed in during the daily check which is to be performed while the plant is at operating temperature. If the button pops out immediately after being pushed in, the filter element must be replaced latest at the end of the shift.

This optical function may also be used for generating contactless electrical signals. For this purpose an electrical upper part is pushed over the hydraulic/optical part. This upper part incorporates all electrical switching elements.

- Optical and electrical indicator with standard check function
- Normally open/normally closed combination - standard feature
- Electrical function, easy to install at a later time
- Two-step indication, at 75 % and 100 % optional
- Signal lock out up to approx. 30 °C optional
- Rugged, non-bypass design
- Optimal element exploitation
- Worldwide distribution

S = dirt side

## 8. Function

The magnetic field as previously described, contactless operates reed contacts in the electrical upper part. The desired contact type is selected by inverting upper part. Another option keeping the electrical signal electronically suppressed up to 30 °C operating temperature is also available. This eliminates false electrical signal during the cold start phase.

For efficient servicing it is desirable to have a pre-warning device (so that the filter element can be replaced, e.g. with the next tool change). For this purpose electrical upper parts with two indicating points, i.e. at 75 % and at 100 % of the indicator setting are available.

7.4 Protection cap	
Designation	Order number
Protection cap for all visual pressure and differential pressure indicators, -20 °C to +80 °C Resistant to: gasoil, purifying agent, insolation, dust, salt, water, concret	78285330

Pressure/vacuum gauges give an analog reading of the existing state of contamination of the filter elements. They require continuous control to ensure that the service time and reserve capacity are not unduly exceeded. If the contamination signal is disregarded, the filter element may collapse or, if a bypass valve is installed, part of the contamination fluid may reach the hydraulic components via the bypass valve and cause failure of the hydraulics.

Pressure/vacuum switches are provided with snap action switches, which ascertains that signal are issued only when the limit values have been fully reached.

Dirt holding capacity -  $\Delta p$  curve

x = dirt holding capacity [g]

y = differential pressure  $\Delta p$  [bar]

\*1 = signal step maintenance indicator 100 %

\*2 = signal step maintenance indicator 75 %

## 9. Technical specifications

### 9.1 Contact type normally open/normally closed

Contact type 1

Types PiS 3085, 3086, 3092, 3097, 3192

Max. voltage: 250 V AC/ 200 V DC

Max. current: 1 A

Contact load: 70 W

Type of protection: IP 65 in inserted and secured status

Contact type : normally open/normally closed

Cable sleeve: M20x1.5

Wiring box: DIN EN 175 301-803

The switching function can be changed by turning the electric upper part by 180° (normally closed contact or normally open contact). The state on delivery is a normally closed contact.

By inductivity in the direct current circuit the use of suitable protection circuit should be considered. Electrical parts are insulated (plastic material housing).

### 9.2 Contact type normally closed or open with signal suppression

Contact type normally closed

Type PiS 3003 (expansion kit)

Contact type normally open

Type PiS 3002 (expansion kit)

Signal suppression by thermorelay

Signal is released at +30 °C

for further technical details see 9.1

### 9.3 Contact type normally closed 2 setting points

Contact type 2

Types PiS 3105, 3106, 3119

1. setting point at 75 % of the indicating pressure

2. setting point at 100 % of the indicating pressure

Max. voltage: 150 V AC/DC

Max. current: 1 A

Contact load: 20 VA/20W

for further technical details see 9.1

### 9.4 Contact type Change-over contact

Contact type 3

Types PiS 3115, 3116, 3125

Max. voltage: 150 V AC/DC

Max. current: 1 A

Contact load: 20 VA/20W

for further technical details see 9.1

## 9.5 Contact type change-over contact, 2 setting points LED

Contact type 4

Types PiS 3012, 3102, 3103, 3104

1. setting point at 75 % of the indicating pressure
2. setting point at 100 % of the indicating pressure

Max. voltage: 10 - 30 V DC  
 Max. current: 1 A  
 Contact load: 20 VA/20 W  
 Type of protection: IP 65 in inserted and secured status  
 Plug connection: DIN EN 175201-804

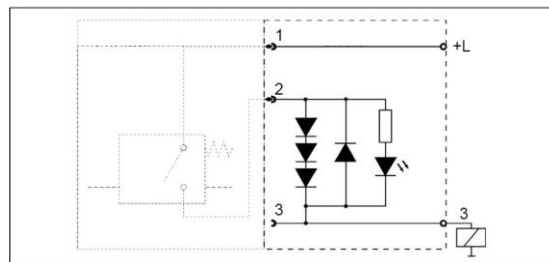

## 9.6 Wiring box with insert lamp

Will be supplied instead of standard connection.

Not to be combined with indicators with 2 setting points.

Max. voltage: 12-230 V AC/DC

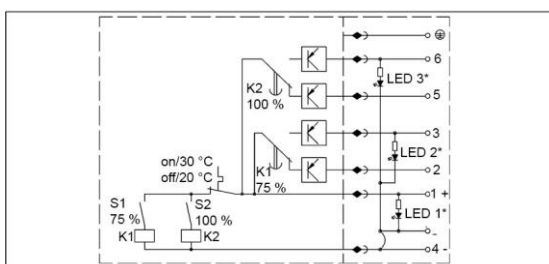

## 9.7 Contact type change-over contact, 2 setting points, LED, signal suppression, time delay

Contact type 5

Types PiS 3131, 3132, 3133

1. setting point at 75 % of the indicating pressure
2. setting point at 100 % of the indicating pressure

Max. voltage: 10 - 30 V DC  
 Max. current: 1 A  
 Contact load: 20 W  
 Type of protection: IP 65 in inserted and secured status  
 Plug connection: DIN EN 175201-804  
 Signal suppression: by thermorelay  
 Signal released: at + 30 °C  
 Signal change down: at + 20 °C  
 Impulse surpression K1 and K2 time delay 10 s

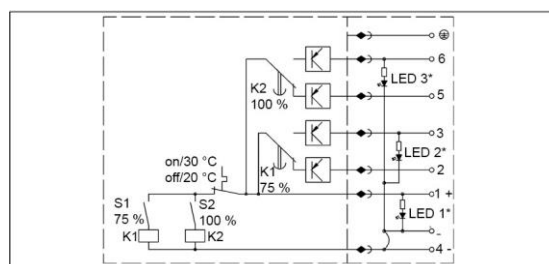

## 9.8 Contact type change-over contact, 2 setting points, LED, signal suppression

Contact type 6

Types PiS 3141, 3142, 3143

1. setting point at 75 % of the indicating pressure
2. setting point at 100 % of the indicating pressure

Max. voltage: 10 - 30 V DC  
 Max. current: 1 A  
 Contact load: 20 W  
 Type of protection: IP 65 in inserted and secured status  
 Plug connection: DIN EN 175201-804  
 Signal suppression: by thermorelay  
 Signal released: at + 30 °C  
 Signal change down: at + 20 °C

LED 1\* = Operating LED green

LED 2\* = Setting point 75 % LED yellow

LED 3\* = Setting point 100 % LED red

### 9.9 Contact type analog 4-20 mA, 2 setting points, LED, signal suppression

Contact type 7

Types PiS 3110, 3120

Max. voltage:	24 V DC
Max. current:	200 mA
Resistance:	500 $\Omega$
Type of protection:	IP 65 in inserted and secured status
Plug connection:	nach DIN EN 175201-804
Output signal:	4-20 mA
Outputs (PNP, max. 200 mA):	cold start signal 75 % setting point 100 % setting point
Signal damping:	20 s

### 9.10 Contact type normally open/normally closed, 2 setting points, LED, signal suppression

Contact type 8

Types PiS 3151, 3152, 3153

1. setting point at 75 % of the indicating pressure (normally open)
2. setting point at 100 % of the indicating pressure (normally closed)

Max. voltage:	10 - 30 V DC
Max. current:	1 A
Contact load:	20 W
Type of protection:	IP 65 in inserted and secured status
Plug connection:	M12x1, 4 pole
Signal suppression:	by thermorelay
Signal release:	at + 30 °C
Signal change down:	at + 20 °C

### 9.11 Contact type normally open/normally closed, 2 setting points

Contact type 9

PiS 3154, 3155, 3156

1. setting point at 75 % of the indicating pressure (normally open)
2. setting point at 100 % of the indicating pressure (normally closed)

Max. voltage:	10-30 V DC
Max. current:	1 A
Contact load:	20 W
Type of protection:	IP 65 in inserted and secured status
Plug connection:	M12x1, 4 pole

### 9.12 Contact type change-over contact

Contact type 10

PiS 3115-M12x1, 3116-M12x1, 3125-M12x1

Max. voltage:	150 V
Max. current:	1 A
Contact load:	20 W
Type of protection:	IP 65 in inserted and secured status
Plug connection:	M12x1, 4 pole

LED 1\* = Operating LED green

LED 2\* = Setting point 75 % LED yellow

LED 3\* = Setting point 100 % LED red

### 9.13 Contact type normally closed, 2 setting points

Contact type 11

Types PiS 3157, 3158, 3159

1. setting point at 75 % of the indicating pressure (normally closed)
2. setting point at 100 % of the indicating pressure (normally closed)

Max. voltage: 10-30 V DC

Max. current: 1 A

Contact load: 20 W

Type of protection: IP 65 in inserted and secured status

Plug connection: M12x1, 4 pole

LED 1\* = Operating LED green

LED 2\* = Setting point 75 % LED yellow

LED 3\* = Setting point 100 % LED red

### 9.14 Vacuum switch PiS 3070

Contact type 1 pole change-over contact

Electrical connection: AMP 6,3 DIN 43248 bushings DIN 46247

Max. voltage: 230 V AC/DC

Max. current: 6 A

Type of protection: IP 00 without cover

IP 54 with cover

Position of installation: individual (position of installation is to be advised if setting point is adjusted)

1 = Supply line

2 = Operating contact

3 = Normally closed contact

4 = Adjusting screw

### 9.15 Pressure switch DSS

Contact type: normally open

Electrical Connection: AMP 6,3 DIN 46248  
bushings DIN 46247  
switch type 2 pole

Max. voltage: 42 V

Max. current: 2 A

Contact load: 100 VA

Duty classification: 200/min

Maintenance indicators PiS 3084, 3087, 3093, 3098, 3193 can be mounted in 45°.

Tightening torque:

Maintenance indicator aluminum with threat M20x1.5  
60 Nm

Maintenance indicator CuZn with threat M20x1.5  
90 Nm

Maintenance indicator stainless steel with threat M20x1.5  
90 Nm

Maintenance indicator plastic with threat M30x1.5  
3 Nm

### 9.16 Pressure Switch DSO

Contact type: normally closed

for further technical details see 9.15

We draw attention to the fact that all values indicated are average values which do not always occur in specific cases of application: Our products are continually being further developed. Values, dimensions and weights can change as a result of this. Our specialized department will be pleased to offer you advice.

When using our filters in areas which are to be classified according to EU directive 2014/34/EU (ATEX), we recommend prior discussion with us. The standard version can be used for liquids based on mineral oil /corresponding to the fluids in Group 2 of Directive 97/23 EG Article 9). Please consult with us if using other media.

Subject to technical alterations without prior notice.
