

OIL AEROSOL SEPARATOR LGA SERIES

EVERYTHING FROM ONE SOURCE

INSTALLATION & COMMISSIONING

ALL CONNECTIONS OF THE LGA OIL AEROSOL SEPARATORS are prepared for mounting to your existing system - eliminating the need for costly welding and conversion work. The modular design also allows direct installation of the main components on and in processing machines.

Our service team will install your new filter system on site and put it through its paces. Our work is not done until your filter systems are running optimally and process and production reliability are guaranteed.

THE FOLLOWING SUPPLIES AND SERVICES ARE AVAILABLE THROUGH OUR SERVICE:

ASSEMBLY AND INSTALLATION

- ✓ Assembly and mounting of the oil aerosol separators by means of a rack next to or directly on the machine.
- ✓ Frames available in various designs, also customized on request

CONTROL PARAMETERS

- ✓ Determination and optimization of the control parameters with regard to the optimum extraction performance
- ✓ Parameterization of the frequency inverter
